[gum bichromate print by stone]

Ed: unique7(No.2-8)+1AP(No.1)

image size: 8×10 inch, print size: 10×12 inch

この作品は Gum bichromate printing (ガムプリント、ゴム印画) の特徴を使い、石の粉末を紙に定着しプリントされています。被写体である石を粉々にし、全ての粉末を使い切るまでプリントを繰り返すことで、1つの石が8枚の石に還元され、写真としてではなく石として展示される作品です。

This artwork is created using the technique of Gum bichromate printing, where stone powder is fixed onto paper to create the print. The subject of the artwork, a stone, is ground into powder and repeatedly printed until all the powder is used, resulting in one stone being reduced to eight prints. The artwork is exhibited not as photographs but as stones.
